MUHAMMAD MUAVIA

AI Engineer Graduate

About Me

Muhammad Muavia Malik is a fresh graduate AI Engineer with expertise in machine learning, deep learning, data mining,
SQL, data science, image processing, and PySpark for big data processing. I have completed my FYP on fashion design trends using generative AI and is currently exploring LLM and generative AI in-depth for future big system projects. I am eager to apply my skills and knowledge in a dynamic work environment, contributing to innovative AI solutions.

📍 Karachi Pakistan

Programming Language

- Python
- SQL

Expertise

- Machine learning
- Deep learning
- Image processing
- Data Mining
- Apache spark
- Generative AI

Experience

AI Internship with Glassogon NEP NIC Startup Karachi
2021- 2023

Glassogon is an AI-based company that has developed an eyewear e-commerce store offering a virtual try-on feature. This feature allows customers to visualize glasses on their faces in real-time and place orders seamlessly.

Education

Sindh Madressatul islam university karachi

Bachelor of Science in Artificial Intelligence 2020 - 2024

Projects

- Stock market sentiment analysis with pyspark
- Flower Recognition using CNN with keras
- Urdu character Recognizer
- Text Classification Using LSTM
- MNIST Loves CNN
- Financial Market Analysis Using Regression
- Fashion Design trends using GEN AI in fyp
- Remaining projects will be placed in Githhub repo please visit this link https://github.com/malikmuavia2002?tab=repositories
